SUMMARY

Data-driven Inventory & Operations professional with 2+ years turning stock, sales, and customer data into decisions, reducing stockouts, improving procurement timing, and building the reporting systems management relied on, using Excel-based analysis and reporting. Now extending that analytical foundation into dedicated data analyst work through hands-on SQL and Power BI projects: relational database design, star-schema data modeling, and DAX-driven dashboards.

DATA PROJECTS

Fraud Risk Intelligence Dashboard — Power BI ***(personal project, 2026)***

Built a six-page Power BI dashboard on 195K+ transaction records; designed a star schema, authored a DAX measure library, and engineered a composite risk-scoring model.

Hospitality Relational Database — SQL ***(personal project, 2026)***

Designed and built a full relational database (GrandStayDB) modeling operations across six international cities; wrote SQL to support reporting queries.

ShopSphere Data Warehouse & Analytics — SQL Server ***(personal project, 2026)***

Built a Medallion Architecture (Bronze/Silver/Gold) data warehouse unifying 77K+ e-commerce records from website and mobile app sources; designed the full ETL pipeline and star schema, then ran RFM segmentation, market basket analysis, and promo-effectiveness analysis to inform a $500K ad spend recommendation.

EXPERIENCE

ROKINWA Foods Merchant Limited – Lagos
Inventory & Stock Manager **May 2024 – Present**

- Tracked and analyzed stock movement data across multiple product lines using Excel, reducing stockout incidents by an estimated 30%, based on month-over-month reorder log comparisons, through timely reorder alerts.
- Built and maintained inventory databases capturing product quantities, supplier lead times, and demand trends improving stock accuracy to 95%, verified through physical stock counts.
- Adopted the FIFO (First-In, First-Out) method, preventing stocks from becoming obsolete.
- Generated weekly and monthly inventory reports in Excel, enabling management to make data-driven procurement decisions.
- Identified and flagged slow-moving stock with high value, driving a targeted clearance strategy that freed up 20% of warehouse space.
- Collaborated with logistics, procurement, and sales teams to reconcile discrepancies and align stock levels with forecasted demand.
- Developed a structured customer purchase-behavior log, revealing seasonal demand patterns that informed stock replenishment cycles.

- Maintained accurate and audit-ready records of inventory transactions, returns, and adjustments.

ROKINWA Foods Merchant Limited – Lagos
Assistant Admin & Data Analyst **April 2023 – May 2024**

- Designed and maintained a customer database in Excel tracking preferences, buying behavior, and interaction history for 500+ accounts.
- Produced monthly trend reports from customer feedback data (calls, emails, complaints) that informed service improvement decisions.
- Analyzed service patterns to identify recurring complaint categories, supporting a targeted resolution strategy that improved response efficiency.
- Assisted in financial data entry and verification for invoicing and payment reconciliation, maintaining a 98% accuracy rate across reconciled invoice records.
- Collaborated with sales and procurement teams to streamline workflows, reducing administrative bottlenecks and improving cross-department coordination.

His Majesty Consult – Remote
Research & Data Personnel **November 2021 – March 2022**

- Collected, cleaned, and processed qualitative and quantitative data from client and stakeholder engagements for research reporting.
- Compiled and summarized findings into structured reports and presentations used to guide project decisions.
- Maintained organized data entry logs ensuring integrity and traceability of research outputs.

EDUCATION

Bachelor of Science - Geography & Regional Planning **Second Class Upper**
Lagos State University, Nigeria

SKILLS

Technical (job-proven): Microsoft Excel · CRM Software · Sage50 (Invoicing) · Microsoft Office Suite

Technical (via projects): SQL · Power BI · Python

Data Skills: Data cleaning & transformation · Data validation · Data review · Data quality assurance (QA) · Querying (SQL) · Data modeling · ETL/ELT pipeline development · Data warehousing · Root cause & Trend analysis · Inventory data management · Report generation · Dashboard design · Data entry & documentation

Soft Skills: Analytical thinking · Cross-functional collaboration · Stakeholder communication · Attention to detail · Problem-solving · Multitasking & Time Management.
